EMMANUEL OLUGBENGA OGUNSOLA

Lagos, Nigeria | eogun-hub on GitHub

PROFESSIONAL SUMMARY

Motivated and dedicated Computer Science undergraduate at Caleb University with a strong academic foundation in software engineering, cybersecurity principles, and data structures. Passionate about building secure, reliable applications and bridging secure software development with automated threat detection and infrastructure defense. Equipped with hands-on project experience in Java, Python, JavaScript, and database management, preparing for professional technical internships in software development and application security.

EDUCATION

Bachelor of Science in Computer Science

Caleb University, Nigeria | Expected Graduation: 2029

- **Current Standing:** 200-Level Undergraduate (Commenced late 2025)
- **Core Coursework & Focus Areas:** Software Engineering, Cybersecurity Foundations, Data Mining, Database Management Systems, Calculus, Discrete Mathematics, and Basic Electronics.

TECHNICAL SKILLS

- **Programming Languages:** Java, Python, C#, JavaScript, HTML, CSS
- **Databases & Management:** SQLite, Relational Database Concepts
- **Tools & Version Control:** Git, GitHub Desktop, VS Code
- **Core Competencies:** Secure Software Development, Object-Oriented Programming, DOM Manipulation, Web Development, Data Structures & Algorithms

---

PROJECTS & ACADEMIC WORK

Java Programming & Software Development Portfolio (`COS201`)

- Developed and maintained clean-code Java applications emphasizing modular design, conditional execution logic, and efficient data handling.
- Managed code repositories under version control using Git and GitHub (`eogun-hub`), ensuring structured commit histories and collaborative readiness.

Interactive Personal Portfolio & Web Applications

- Engineered a fully responsive single-page portfolio featuring dynamic navigation, anchor routing, and customized CSS styling.
- Built interactive front-end components including structured project tables, embedded media players, and downloadable asset links utilizing HTML5 and modern CSS.

PROFESSIONAL GOALS

- **Career Objective:** Secure a technical internship (such as SIWES placement) in software development, data analytics, or cybersecurity to apply theoretical knowledge to real-world infrastructure and threat mitigation.
- **Long-Term Vision:** Advance into a professional career as a Security Software Engineer or DevSecOps Specialist, focusing on application security engineering and automated defense pipelines.
